

THE EMPRESS EXPRESS

VOLUME XIX. No. 20

EMPRESS, ALTA. THURSDAY, Oct. 15th, 1931

Price: \$2.00 Per Year.

United Church

Social Plains, 2:00 p.m.
Leland, 3:30 p.m.
Empress:
Sunday School, 2:00 p.m.
Public Worship, 7:30 p.m.
Come and worship with us.
Rev. Geo. A. Shields,
Minister.

Bindless Farmers' Club

Owing to some unavoidable delays we were unable to get the prize lists out as soon as we would have liked, but we wish to announce that there will be standardized classes for cooking and preserves, also that we are making arrangements to have an afternoon seat on Friday, Nov. 6, for all the school children in the district and there will be a prize for the school having the best display of Art work done by the children of the school in 1930-31, in grades 1 to 8; lecture and pictures for the children, if possible, will also be given. Watch for posters.

Don, Cameron won the best spread raffled by J. Lawenck.

CARD OF THANKS

We desire in this manner to express our thanks for the kindness and sympathy offered to us in our recent sad bereavement, also to those who sent floral tributes—Mr. and Mrs. F. H. McCullough and family.

CROZIER MORRISON

A very quiet but pretty wedding was solemnized at the home of Mr. and Mrs. Henry Crozier, on Wednesday, October 14th, when their eldest son, Robert Thomas, was united in marriage to Miss Violet Elaine Morrison, daughter of Mr. R. Morrison, of Empress.

The bride was charmingly attired in an ensemble of white georgette and lace with a corsage of purple violets, while white shoes and stockings completed the ensemble.

The ceremony was performed by the Rev. Geo. A. Shields in the presence of the immediate members of the families of the bride and groom.

After the wedding dinner the happy couple left on a short honeymoon for points East, and on their return will reside in Empress. We join with the community in expressing best wishes for their happiness.

Cooked Bannana Boom Pushed By Australians

Brisbane, Queensland.—Plans to popularize the cooked banana, which is scarcely known here, as a means of easing the expected glut in the banana fields of Queensland and New South Wales, are being made by the New South Wales Banana Growers Association.

Output for the season is estimated at about double the normal output, the figures being put at 1,750,000 cases.

W.M.S. Thankoffering Service

On Wednesday afternoon the ladies of the Women's Missionary Society, assisted by the affiliated groups, C.G.I.T., held their Thankoffering Service in the United Church. Mrs. Arthur presided. The program was as follows:

Hymn: Lord's Prayer.

Solo: "Come ye thankful people, come," by Mrs. Leslie H. Shannon.

Prayer, Rev. Geo. A. Shields. Scripture reading, Mrs. Kelley and Mrs. Crocker.

Hymn: "God's hand may be seen in the dew-drop," sang by Henrietta Turner, Grace Robertson, Greta Hanna, Beatrice Brodie and Middy Arthur.

Collecting.

After which a playlette was given entitled, "The two boxes." Those taking part were: Helen Arthur, mother; Madge Frost, 17-year old daughter; Iona Anderson, Connie McCune, Gloria Macleod, three younger children. The play typified the true spirit of missionary work.

Mrs. Arthur spoke a few words regarding the needs of the Society and told of the work being done by the women. Miss Jean Kelley was accompanist for the musical offerings.

The meeting closed with the Doxology and Misses Benediction.

The ladies entertained the audience at ten in the schoolroom.

World's Grain Show Postponed One Year

The World's Grain Exhibition and Conference, which was to have been held in Regina in 1932, has been postponed until 1933.

Announcement to this effect was made on Thursday night by Hon. Robt. Wain, federal minister of agriculture and chairman of the national committee of the grain show, after he had received resolutions from the council of the Regina Board of Trade and the Board of directors of the Regina Agricultural and Industrial Association, urging that it be postponed for a year rather than be cancelled.

More than two score countries were expected to take part in the exhibition, plans for which were started two years ago.

Judge Greene Shot At By Fowler

Judge Greene, of Medicine Hat, who presided at the district court sittings here last week had a narrow escape from death, when he was shot at by an unknown. Working in his basement on Saturday night, he was attracted outside by a noise on the grating. He saw a man standing about fifteen feet away, he felt a burning sensation and something whizzed past. He was found to have a slight flesh wound near to his heart. The cause for the attack is not known.

Death Results From Kick By Horse

Jack McCullough, of Buffalo, Lost Life When Attempting To Catch Horse to Ride

The death occurred near 11 a.m., of John Dale Howard, son of Mr. and Mrs. Frank McCullough, of Buffalo. Death was accidental and tragic in circumstance. The boy was about to catch an aged horse to ride when the animal kicked him in the body near his heart. He had succumbed from the effects of the blow soon afterwards. He was 8 years and 10 months old. Dr. McNeill viewed the body.

The funeral service was conducted by Rev. G. A. Shields of the United Church; at Buffalo, on Monday interment taking place in the Empress cemetery. There was a very large attendance of relatives and friends at the funeral. We join in the general expressions of condolence and sympathy to the bereaved family.

Storing Roots

In a climate where sub-zero temperatures clamp down suddenly as they often do in the Outlook West, the storage of roots is quite a problem. If pitted too snugly before the weather turns cold they are liable to heat and sprout. If not promptly cared for when the weather turns they are likely to be nipped. Time and again the Superintendent of the Beaveridge Substation has stored some temporarily for autumn use with a covering of straw, or straw plus a little earth. Almost invariably the least or some of these roots are caught by an unexpected onset of rough weather, frost penetrating the pile especially where exposed by daily removal.

The ideal root storage for Prairie Canada is a dugout cellar opening into a stable so that it may safely be entered in any weather. The cellar may be well banked with straw and should have one or more ventilating shafts. In the extreme weather of mid-winter the ventilators may be stuffed with sacks of chaff or shavings.

Almost invariably the least or some of these roots are caught by an unexpected onset of rough weather, frost penetrating the pile especially where exposed by daily removal.

With such a cellar, roots if stored in sound condition may be kept firm and appetizing until May, and a few will be of great advantage to all classes of livestock towards spring. Experimental Farms Note

Twelfth Govt. Crop Report

Issued by the Department of Agriculture, Edmonton, Oct. 3.

Cutting of grain is ninety five per cent completed throughout the province. A few late fields of green feed in the northern districts remain but this does not amount to more than five per cent of the crop area.

The amount of threshing done varies considerably. A period of from one to two weeks of dull, rainy weather caused threshing operations to cease over practically the whole province. The past week has been generally dry and bright and threshing has been resumed. South of Calgary about ninety per cent of threshing is completed and this proportion gradually decreases towards the north. In the area north and north east of Edmonton threshing is only commenced and will not be general until next week. In the central part of the province about twenty per cent of wheat has been threshed and in the Peace River district about thirty-five per cent.

Yields are satisfactory in all parts of the province with the exception of the dry area. Grapes have been adversely affected by prolonged wet weather, a condition which has been rapidly improving within the past few days. With present weather conditions it is hoped a very large percentage of wheat in the northern districts will receive straight grades in the course of a few days.

Harvesting of sugar beets is

At other times they may be more lightly stopped, being opened entirely by day in mild weather. A thermometer near the floor will assist in regulating the ventilation suitably.

If the bin is large it will have to have a false floor and walls, with air space under and around the roots. A shaft or two in the centre of the bin will also help.

With such a cellar, roots if stored in sound condition may be kept firm and appetizing until May, and a few will be of great advantage to all classes of livestock towards spring. Experimental Farms Note

Hospital Notes

E. Vladisav was brought into town on Tuesday, with both bones of the left leg fractured above the ankle and a number of body bruises, etc. The team of horses he had been working with had bolted on him. He was found in the roadway near Charlie Johnson's farm by Albert and Barney Kreller and was brought into town to the hospital by them.

G. (Brownie) Freed, underwent a serious emergency operation on Saturday afternoon, he is improving daily.

Miss L. Neihauer, of Burdell, who underwent an operation for appendicitis ten days ago, returned home, on Tuesday.

In progress in the irrigated district in the south, about twenty-five per cent of the crop having been hauled. Conditions with regards to sugar beets have steadily improved throughout the season and it is now estimated that the yield per acre will be at least equal to that of last year. The sugar content is also reported to be high.

Potato digging is in progress. A fair crop of good quality is reported in the northern part of the province and a heavy crop in northern districts.

Very little fall plowing has been done.

Feeder cattle are moving in considerable numbers to feed lots in Southern Alberta, particularly in the irrigated areas where there is an abundance of alfalfa and other fodder. There is considerable movement of cattle out from the dry area to these parts of the province where feed is plentiful. Pasture conditions have been slightly improved in the south by recent rains.

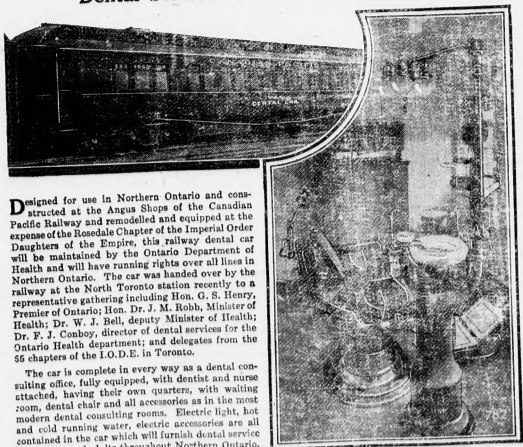

Golfers (to partner) — "Just look at that girl dressed like a man. What are her parents thinking of, anyway? I think it is disgraceful."

Partner — "That, sir, is my daughter."

Golfers — "I beg your pardon, I didn't know you were her father."

Partner — "I'm not. I'm her mother."

Dental Service to Northern Outposts

Designed for use in Northern Ontario and constructed at the Angus Shops of the Canadian Pacific Railway, remodeled and equipped at the expense of the Rosedale Chapter of the Imperial Order Daughters of the Empire, this railway dental car will be maintained by the Ontario Department of Health and will have running rights over all lines in Northern Ontario. The car was handed over by the railway at the North Toronto station recently to the representative gathering including Hon. G. S. Henry, Premier of Ontario; Hon. Dr. J. M. Robb, Minister of Health; Dr. W. J. Bell, deputy Minister of Health; Dr. F. J. Conboy, director of dental services for the Ontario Health department; and delegates from the 55 chapters of the I.O.D.E. in Toronto.

The car is complete in every way as a dental consulting office, fully equipped, with dentist and nurse attached, having their own quarters, with waiting room, dental chair and all accessories as in the most modern dental consulting rooms. Electric light, hot and cold running water, electric accessories are all contained in the car which will furnish dental service to children and adults throughout Northern Ontario.

CANADIAN CHAMBER OF COMMERCE BUSINESS MEN VIS

IT MANITOBA'S SEAPORT

teeling to C. H. Wright, of Halifax. 5. Station at Churchill. 6. Delegates from the Maritime Provinces. The party goes boating on Hudson Bay. 8. A. E. Warren, Vice-President, Canadian National Railway, Innipeg. 9. Three special Canadian National trains which carried the party north. 10. New 2,500,000-lb elevator at Churchill. 11. Canadian Chamber of Commerce party.

navigable ever for small boats, prospectors resort to back-packing. One man set out, early in the spring, with a wheel-barrow, on which was loaded his rocker and other equipment. His destination was 40 miles out.

The original home of Limburger cheese was Belgium.

Drought Problem

Commission Is Investigating Ways
And Means To Help Wast

Saskatchewan is grappling with the drought problem. To study and provide for the conservation of water within the province, in an effort to prevent such a condition as now prevails, a drought commission has been appointed. The necessity for Alberta and Manitoba, to which the drought area has extended this year, seems urgent. Scientific study of the question as affecting all the prairie provinces and the devising of practicable methods of relief, appears a pressing western problem of the moment, as moisture is undoubtedly the element in crop production that has been neglected.

In this connection the Winnipeg Tribune, which recently made the suggestion that a drought commission be appointed, says:

"If all the water that runs off the prairie provinces in the spring, or even a reasonable proportion of it, could be conserved, there would be no dry years in Western Canada. The trouble is we have drained innumerable sloughs and lakes and muskegs, and have neglected to provide anything in the way of substitutes for the reservoirs that have been destroyed."

The prospect now is that we will have to dam the western rivers and creeks and provide great artificial reservoirs to hold the water we have, both with the purpose of raising the water level in the subsoil and of creating rainfall.

Millions of trees if set out in the proposed areas would serve the same purpose to some extent. The more trees the less we will suffer from drought conditions.

Throughout Canada, the recommendations of the Saskatchewan Drought Commission, and the decision of any investigating bodies that may be named by other prairie provinces in the way of averting such national calamities as have followed three dry years in portions of Western Canada, will be eagerly awaited. The Tribune's suggestion may well receive the serious attention also of Manitoba and Alberta.

Control Of Truck Traffic

Seek Uniform Regulations On Inter-Provincial Highways

Uniform regulations for the control of motor and truck traffic on inter-provincial highways is proposed by the Saskatchewan Government.

Hon. A. C. Stewart, Minister of Highways, will make strong recommendations before this convention of the Good Roads Association of Canada to be held in Lacombe, Quebec.

Uniform regulations in each province to govern the whole matter of passenger and freight traffic over provincial highways will be recommended. Saskatchewan, according to the Minister of Highways, has taken the lead in the western provinces in the matter of regulating this traffic. The introduction of high grade highways increased the traffic to such an extent that regulations were brought down a year ago.

Placing the Blame

Uncle Dan, centenarian, and ex-slave, is a pensioner of a South Carolina family. One day, while he was drawing his regular dole, his present patron took occasion to rally him good humouredly on not being worth the cost of his upkeep; in fact, of being lazy and no-account in general.

"Yes, sah, I expect that's right," the old man agreed. "But it ain't my fault. I remember the day when your grand-pappy paid \$1,000 for me and then Mr. Lincoln came along with the 'manicipation proclamation and made me just plumb worthless.'"

Grape Crop Smaller

The Niagara district grape crop is not going to be as bountiful as at first estimated, according to the Ontario Growers' Council. Maximum for the crop is now placed at between 19,000 and 21,000 bushels, a drop of some 12,000 bushels from the original estimate.

"My brother is only happy when he's quarrelling."
"Then why doesn't he marry?" — Ben Huron, Madrid.

Save Big Trees In B.C.

Montreal Conservationists Deplore
Ruthless Destruction Of All Old
Giant

Frank J. D. Barnum, of Montreal and Annapolis, N.B., completed the purchase of another virgin tract of "big trees" in the Salishian district of Vancouver Island, in order to prevent their being sacrificed to the axe. This is the second tract purchased by Mr. Barnum and the fourth tract purchased by him and his friends.

One of the big trees at Barnum's place had a circumference of 33 feet, 11 feet in diameter at the stump and is estimated to be some 600 years old. He pointed out that consequently it must have been more than a sapling at the time William the Conqueror invaded England.

"How anyone can ruthlessly cut down such age-old giants as this, especially without any profit to the operator, is beyond my conception," he said.

"The cost of reproducing a tree of this size and age would amount to many millions of dollars, compounding interest on planting cost alone without figuring taxes or any other charges."

Build Scenic Highways

Undertaking May Provide Work During Winter Months

Unemployed men in the national parks and from parts of the western Canada will be given work on the proposed Lake Louise to Jasper scenic highway this winter.

The number of men to be employed is unknown. It is expected that, if completed, would be the longest scenic highway in the continent.

Twelve surveyors left Banff for Lake Louise recently, and it is expected they will make camp north of the famous resort. It is also believed that J. M. Wardle, chief engineer of Canadian National Parks, at present in Jasper, is making arrangements for surveying the northern end of the proposed highway, which would be 160 miles long.

The road would wind through the valleys immediately east of the main chain of the Canadian Rockies, passing the Columbia ice field, which covers 150 square miles.

Tax Hits Blacksmith

May Have To Increase Fees For
Gretina Green Weddings

The economy programme of the National Government of Britain has struck the famous "wedding blacksmith shop" of Gretina Green.

The romantic smithy and its attached museum heretofore have been assessed a value of about \$150. The assessment for this year was about \$4,500 and the prospect was that the smithy would have to increase the prices for its easy and quick marriages or go out of business.

An appeal was argued in court at Dumfries.

The court finally fixed upon a valuation of \$2,500 on the smithy and its attached museum. It was testified that 66,824 persons visited the shop and museum last year, and that the revenue amounted to over \$8,000.

Women Make Good Pilots

But Less Capable Than Men Opinion
Of Air Authority

"The air rivalry between the sexes has been carried a stage further by the announcement that the 10,000th Royal Aero Club aviator's certificate has been granted—to a woman," says The Manchester Guardian.

"Many women are now in training to become air pilots," an air authority said to a reporter, "but whether the number of women will catch up with men is a matter for the future. Women make very good pilots because they have a very light touch, but I would not say they are as capable as men in an emergency, because they do not seem to have that self-command which a man possesses. They are liable to lose their heads. The majority of women who fly are young people who find aviation a fine way of passing their spare time."

Right At That

Teacher—How many days in a year, Johnnie?
Johnnie—Seven.
Teacher—Wrong. There are seven days in a week, but how many in a year?
Johnnie—Seven.
Teacher—No! How many days in a year?
Johnnie—Seven. Sunday, Monday, Tuesday, Wednesday, Thursday, Friday, Saturday, and if there are any more I've never heard of them.

Latest census figures show that the world's greatest capitals are London, with 8,202,818 inhabitants; New York, with 6,981,927; Berlin, with 4,322,034, and Paris, with 2,871,429.

A flawless emerald is the most highly prized gem stone.

Started In Small Way

Exhibition Of Inventions At Paris Is
Annual Event

Twenty-nine years ago, when M. Louis Leprieux was Prefect of Police, in Paris, he was accented on the Grand Boulevard by a street hawk, who wanted to sell him a toy of his own invention. The Prefect was so interested in the poor man's story that he straightway decided to hold an exhibition every year at which people who invented and manufactured toys would find a market for their wares.

The Concours Leprieux, as the fair is known, has grown until it has become one of the most Parisian features of the year, and where at the beginning it numbered only 100 exhibitions, it has this year in the Exhibition Park of the Porte de Versailles almost two thousand.

To wander by the stalls is to see on the faces of the poor inventors all their hopes and fears. To most of them the toy, household article, mechanical device or novelty, has meant the work of a year, perhaps a lifetime. Success at the Exhibition means all the difference between poverty and modest riches. Knowing all this the average Parisian does not begrudge his patronage, and whole families roll up to the entrance prepared to buy something, if not for themselves, at least for some kiddie.

It is wonderful what the minds of the inventors have conceived in the way of toys. Aeroplanes, engines and fire trucks, automobiles, motor boats and steamers, emulate the real things with a precision which is almost uncanny. And out of them all there is at least one idea which will add to the progress in machinery.

Among the household stuff, the outstanding invention is a Table-Top inspired, no doubt, by the smallness of the modern apartment. Anyway, a Frenchman never likes to be too far away from his meal, even if he has to sleep with it. And in that he is not alone.

Lauder Will Celebrate

Sir Harry Lauder will celebrate his 50th year on the stage by giving a concert next August at Arbroath, Scotland, where he made his first appearance in 1882. "It started here," he said, "as a half-timer—I was in the mill and a day in school—and I won a competition. They gave me a knife and a gold watch, I sold the knife for 3d. to buy an ounce of tobacco." His first song was, "Though Poor I'm a Gentleman Still," and he will sing it again at Arbroath next year.

A psychologist who has studied animals, concludes that the cow is more intelligent than the horse.

Canada Will Receive First
The Canadian dollar is perfectly certain to be one of the very first countries to weather the storm and recover from the present depression," declared Julian Pigott, managing director of the British Steel Export Corporation, in an interview at Ottawa. "We all feel that in England," added Mr. Pigott, who was the guest of Sir William Clarke, British High Commissioner.

BRITISH MENACE

The women's national golf championship of the United States has taken on the aspect of an international affair since the entrance of Ed Wilson (above), British champion. Miss Wilson will prove a hardy opponent for Glenna Collett Vare, who is ambitious to win the title for the fourth consecutive time.

Postpone Transfer Of Mounted Police Post

Authorities Still Hope To Find Missing German Scientist In North

Because the authorities feel there is still a faint hope of finding alive the German scientist Krueger, missing since the spring of 1930 in the wilds of Axel Heiberg Land, they have deferred for another year the proposed transfer of the Royal Canadian Mounted Police post from Bache Peninsula to Craig Harbour, according to word brought back by the steamship "Boethic," which arrived at Sydney, N.S., recently, from the north.

Canada Will Receive First
The Canadian dollar is perfectly certain to be one of the very first countries to weather the storm and recover from the present depression," declared Julian Pigott, managing director of the British Steel Export Corporation, in an interview at Ottawa. "We all feel that in England," added Mr. Pigott, who was the guest of Sir William Clarke, British High Commissioner.

Canada Will Receive First
The Canadian dollar is perfectly certain to be one of the very first countries to weather the storm and recover from the present depression," declared Julian Pigott, managing director of the British Steel Export Corporation, in an interview at Ottawa. "We all feel that in England," added Mr. Pigott, who was the guest of Sir William Clarke, British High Commissioner.

HUNDREDS DEAD IN BRITISH HONDURAS HURRICANE

Press reports from British Honduras report that untold havoc has been wrought by a hurricane which has wiped out the entire town of Belize. Houses in this once tranquil town are now in ruins while others have been washed away by the sea. More than a thousand persons are reported dead. These pictures show two views of the capital of the little colony.

The Story Of The Grape

Was Cultivated By The Ancients Over
Five Thousand Years Ago

The grape is one of the oldest fruits known to man, and it is one of the most healthful, wholesome and nutritious. It delights whether used as dessert, or prepared as jam, jelly, conserve or beverage.

Records show that the grape was cultivated by the Ancients over five thousand years ago, and so important was it in national health and national economy that its introduction was ascribed to a god. With the Romans this god was Bacchus, with the Greeks, Dionysus; with the Egyptians it was Osiris; while the Hebrews ascribed its introduction to Noah.

When the Norsemen first visited the North American continent over 1,000 years ago, they found the grape growing wild in "Vigeland" as they named what we know as New England, while in more recent times a wide variety of species have been introduced from Europe.

Grape production in Canada is rapidly growing in importance both in Ontario and British Columbia. The varieties produced include the blues, ambers and whites. The 1931 crop has matured with excellent quality, ensuring an ample supply at prices attractive to everyone.

Factor In Depression

Says France and U.S. Must Disperse
Gold Accumulation To Bring Back Normal Conditions

Until the accumulated gold surpluses of the United States and France are dispersed there is no hope of an end to the present depression, Bernard K. Sandwell, F.R.S., of Montreal, told the Canadian Club at Winnipeg.

The depression, he said, was due to the fall in prices. The decline in prices was due to the method of collecting war debts which caused the accumulation of \$8,000,000,000 in France and five billions in the United States.

"There is a total of \$11,000,000,000 of gold in the world," he said, "and at least four billions is doing no work as money."

Canada should detach the dollar from the gold standard, Mr. Sandwell said, and place it at a value representing its purchasing power between 1922 and 1927.

"The Canadian dollar in 1921 was down to 76 per cent. of the United States (gold dollar)," he said. "We can do the same again with no danger and no more disturbance."

Rumanian state railways have just launched a programme of extension.

Change For Good

The Better

Bishop Of London Has Rare View Of
Modern Youth's Morals

The Right Rev. A. F. W. Winington-Ingram, Bishop of London, speaking at Lancaster, had a good word to say for the modern generation which receives, generally and metaphorically speaking, more kicks than commendation. The Bishop compared the deportment of young people today with their behaviour in his own younger days and said he believed the changes which had taken place were a good thing. Freedom between the sexes in social life and co-operation had brought about a splendid spirit of comradeship.

It is a refreshing variation from the sermon so often preached on the same set of facts by those who refuse to recognize that manners and customs of the more-and-bugger era inevitably had to change to keep step with a world revolutionized by the inventions and developments of the present century. There are always those who see in changed manners a decay in morals. The Bishop of London has the superior view.

Rules of conduct which circumscribed the activities of well-brought-up young men and women in previous generations ago, would appear intolerable, atrocious, even to those who suffered from them. Young men and young women would not need supervision. They were hedged about with d's and don'ts and prohibitions of the more-and-bugger era.

The girls in particular, under the severe eye of Mrs. Grundy, led what we should consider a rather unnatural existence. Tight-laced and burdened with clothes, girls fainting on the slightest provocation or on none. Today the average girl, dressing more natively, is apt to be harder than a boy of the same age, and she rivals him in endurance in her late swims and plays golf and tennis and drives a car; she meets him on an even footing in shop and office and most of the professions.

This altered and improved outlook of life of course is not confined to those now in their late teens and the twenties. A man of forty and a woman of thirty used to be considered getting "old," passing their best days in the dreary monotony of the home. Today at thirty many men and women are young, enjoying life, doing their best work, and at seventy still are keeping up with the procession—reading, swimming, golfing, working.

The world has changed, the people in it. Looking back and looking ahead, who, who would say these changes are not for the better? — Ottawa Journal.

Electric Washers

Old Hand Type Machine Rapidly
Passing Into The Discard

It is evident from a recently issued official report that the hand-power washing machine is rapidly passing into the discard in Canada. Of the 86,058 washing machines made in Canada last year, 67,577 were electric machines, 10,228 for operation by other power, and 8,153 were hand machines. The total value of the 86,058 machines was \$9,291,711, of which the electric machines accounted for \$8,897,068, other power machines for \$440,851, and the hand machines for \$143,792. The use of electric power for a variety of domestic uses is becoming rapidly more general throughout the country. In most places in Canada electricity is a very cheap product owing to the abundance of water-power, from which most of the electricity used in the Dominion is generated.

U.S. Well Doctored

There is one doctor to every 800 persons in the United States, the U.S. Department of Interior found. This is the highest rate of any nation. Sweden, with one doctor for every 2,860 persons, has the lowest rate.

Four omnibus lines in England have merged into a \$3,500,000 concern.

A machine which peels oranges expertly has been installed in a New York hospital.

WORLD HAPPENINGS BRIEFLY TOLD

Twenty-two vessels, nearly all Diesel equipped, were launched in Japan in the first six months of this year.

Professor Edwin R. A. Seligman, internationally known economist of Columbia University, thinks the suspension of the gold standard by Great Britain will stimulate industry.

Miss H. D. Hoberker, for nine years leader of the Young Women's Christian Association in Nova Scotia, has been appointed national secretary of the Y.W.C.A. for Canada.

The memorial to those who lost their lives when the giant dirigible R-101 crashed in France last night has been unveiled above the graves of the victims in Cardington churchyard.

Estimating a wheat average for the province of 16 1/2 bushels per acre, a general crop report issued by the Alberta Wheat Pool places the Edmonton district above all sections with an average of 28 bushels to the acre.

Further discouragement to British migration to the Dominion appeared in an announcement from the Overseas Settlement Department that the special \$50 passage rate for British settlers to Canada was withdrawn October 1.

"Assurance that the Dominion Government would assume 50 per cent. of the total cost of unemployment relief work in Alberta, including labour and material, has been announced by Hon. G. L. McPherson, Provincial Minister of Public Works.

Sir Howard Grubb, noted authority on astronomical instruments and builder of them, died recently in Dublin. Sir Howard has sometimes been credited with the invention of the submarine periscope and he made many developments on it.

Stubble Should Be Burned

Method Has Proved Superior To Any Other Treatment

When stubble has been burned off the land grain needs only a minimum amount of cultivation, the yields of grain have proven this method to be superior to any other stubble treatment, according to results obtained by the Dominion Experimental Farms over a number of years. Objections to the burning of stubble are loss of nitrogen loss of moisture, and some loss of soil fertility; while supporting the practice is weed control, clean crop, and convenience.

Reasonable Return

"Yes, sir, I spent \$2,000 on my daughter's education, and now she's gone and married a fellow with \$300 a year. What do you think of that?"

"Oh, well, it's six per cent on your money, what?"

A machine has been invented to peel willow sticks that are to be used in weaving baskets and making furniture five times as fast as the work can be done by hand.

Flake Lye

*Lye should never be dissolved in hot water.

Use full strength Gillett's Lye to keep all your drains clean and free-running.

A small quantity poured down your sinks and toilet bowl, each week, will rid them of all dirt accumulations and save you costly repair bills.

For all household cleaning, one tablespoonful of Gillett's Lye dissolved in a gallon of cold water provides a safe solution for washing floors, tiling, refrigerators, etc.

The new FREE Gillett's Lye booklet describes many other ways this handy product can help you with all your cleaning. Send for it.

Text Books In Schools

Few Changes Required By Department Regulations In Saskatchewan

Allegations that the Saskatchewan Department of Education has authorized radical changes in school text books involving needless expense to parents in three days of financial depression, are declared unfounded in a recent statement to the press, emanating from the Department. The statement asserts that the new curriculum recently adopted for public and high schools of the province does not require the scrapping of old text books and the purchase of new. In fact, it is set forth that, pursuant to instructions from the Minister, T. M. Anderson, as Minister of Education, pupils having access to old school books formerly authorized by the Department, are not required to purchase new ones.

The statement further shows that, far from causing additional expense to parents, the new curriculum actually calls for a smaller expenditure on books than ever before. Certain text books have been eliminated, thus making savings possible, while the only new books authorized are inexpensive.

In the public school grades, the only new book to be authorized was the Congdon Music Primer (grades one to four), for use of grades three and four. This was necessitated by the addition of music to the public school curriculum in all grades. On the other hand, *Elegant Composition* (price \$5.00), formerly a text book for grades five to eight, and *Public School Grammar* (35 cents), formerly an alternative text with English grammar in grades six to eight, have been dropped, as no text book is authorized in this subject. Further, the cost of the Canadian Speller, which has been dropped, from 40 cents to 30 cents.

With the exception of literature selections in English and foreign languages, the high school text books authorized for this year are almost identical with those of last year, according to the statement. Selections in supplementary reading have been changed throughout, in compliance with earnest requests from high school teachers. Literature selections in grades nine and twelve have been changed for the same reason, while a few changes have been made in Latin, French and German prose. It is the usual practice for departments of education to change the selections in English and foreign languages annually, but, the statement adds, no changes were made in Saskatchewan for 1920-31.

The cost of literature and foreign language texts, it is pointed out, ranges from 16 to 26 cents. In grade twelve Biology, the former text book being out of print, it was replaced, necessarily, by the revised edition. However, pupils who have used the old text are not required to purchase the new book.

Free Distribution

Carrying the economies with regard to school text books further, the Department of Education has made arrangements with the Saskatchewan Text Book Alliance for the collection of used text books, and their distribution, free of charge, amongst schools in the dried-out areas of the province.

Lovely Skin

Vegetable Pills Did What Creams Couldn't

"I had (writes Miss E. T. Clapham) that Carter's Little Liver Pills did more to keep the complexion clear and the skin free from blemishes than all the face creams I have ever used. Carter's Little Liver Pills are no face cream. They are a real VEGEtable and have a definite, tonic action upon the liver. They end constipation, indigestion, Biliousness, Headaches, Acidity, All Skins, and the face red, pale, and dry."

For Eucharistic Conference

Cunard Steamship "Lancastria" Chartered For Special Trip To Dublin, Ireland

The Cunard "Lancastria" has been chartered by Thos. Cook & Son, famous world-wide travel organization, for a special trip to Dublin, Ireland, next June, for the great Eucharistic Congress which will attract thousands of pilgrims to the Holy See. Thos. Cook & Son, it may be recalled, were recently appointed by the Holy Father as the Official Travel Agent to the Holy See at Rome.

During the five days of the Eucharistic Congress the "Lancastria" will stay at Dublin to enable her passengers to make use of the ship as their hotel. This is an especially important feature in that it not only makes a visit of a trip to the Congress cheaper, but also will make the trip more comfortable since every available hotel and boarding facility of the capital of the Irish Free State will be taxed to the utmost during that period.

The minimum round trip rates for the "Lancastria" cruise will be \$300 in Cabin Class and \$285 in Tourist Class.

Cunard agents throughout Canada and the United States are urged to book freely for the Eucharistic Eucharistic Congress trip. They will be protected by Thos. Cook & Son on the regular steamship commission.

It is certain to be a large movement to Ireland for the Eucharistic Congress, since many of Irish birth or descent in Canada and the United States will make the splendid opportunity to attend this impressive demonstration of religious faith and to see at first hand something of the new Ireland which is rising on the ashes of the old. Today the Irish Free State is classed as one of the very small number of nations in the entire world which have not suffered materially from the economic depression. In fact, the time is something of a boom and steady progress is being made in the line of manufactured products of various types and the aggregate work of the country.

Recipes For This Week

(By Betty Barclay)

GOLDEN RINGS

Select large yellow cucumbers. Pare and cut them in slices one-half inch thick. Boil over night in salt water one quart per salt to one quart water. Drain and cook in the same water for twenty minutes. Drain again and add them to a pickling syrup made of the following ingredients:

- 2 pounds sugar,
- 1 pint vinegar,
- 1 pint water,
- 1 lemon, sliced thin,
- 1 tablespoon cinnamon,
- 1 teaspoon cloves,
- 1 teaspoon allspice.

Cook the cucumber until the rings are clear and the syrup thick. Seal in hot, clean jars.

LEMON CREAM FILLING

(Sufficient for 1 three-layer cake)

- 1 egg,
- 1 cup sugar,
- 4 tablespoons cornstarch,
- 1 cup water,
- 1/2 cup lemon juice,
- 1/2 teaspoon grated lemon rind,
- 1 tablespoon butter.

Beat egg, add sugar and cornstarch. Mix well. Add water, lemon juice and rind. Cook in double boiler 15 minutes, stirring frequently. Add butter. Cook in double boiler on cake.

The forests of Canada are its second most important resource, exceeded in actual value only by farm products.

The Four Man's Friend.—Put up in small bottles that are easily portable and sold for a very small sum. Dr. Thomas' Eucalypti Oil possesses power in concentrated form. Its cheapness and the value of the oil, which can be put make it the poor man's friend. No dealer's stock is complete without it.

England's Speed Records

England's official speed records for air, land and water despite the unfortunate termination of the race at Detroit are as follows: Airplane Squadron Leader A. H. Orlebar, 357.7 miles an hour with a Supermarine Palla-Royce S.E. Automobile Malcolm Campbell, 246.06 miles an hour. Speedboat—Raye Don, 110.223 miles an hour, with "Miss England II."

LOST 30 lbs. FAT IN 3 MONTHS

AT THE AGE OF 40

"I was very stout, and I have taken Kruschen Salt for 3 months, and have reduced from 212 lbs. to 182 lbs. (age 40). I am a hearty eater, and have never felt any ill effects whilst I have been taking Kruschen salt. Thos. Cook & Son, it may be recalled, were recently appointed by the Holy Father as the Official Travel Agent to the Holy See at Rome.

The Do-X is an experiment and its mishaps may be attributed to this. For the time being, her size attracts our imagination. With a wing spread of 152 feet and a hull 31 feet long, the Do-X is more than a deck providing ample quarters for passengers and crew. It is possible for her to carry a pay load of from sixty to seventy passengers, in addition to a crew of twelve. In one trial flight she actually carried 160 persons. As a result, on her recent flights, the Do-X is reported that the passengers en route to New York had a dance on board ship after leaving Hampton Roads.

HEADACHE

Nerves on edge. A head that throbs. You can't stop work, but you can stop the pain with a hurry. Aspirin will do it every time. Take two or three tablets, a swallow of water and you're soon comfortable. There's nothing half-way about the action of Aspirin. You will always get complete relief when you take these tablets.

These tablets should be in every shop, office, and home. Ready to relieve any sudden ache or pain, from a grumbling tooth to neuralgia. Don't suffer with that headache.

ASPIRIN

THE HOUSE OF DREAMS-COME-TRUE

—BY—

MARGARET FEDLER

"The Splendid Wife," "The Hermit of Far Road," Hodder & Stoughton, Ltd., London.

CHAPTER 1.—Continued.

"Staple? Is that the Brennans' place?"

"God bless my soul, no! The Tormarries acquired it when they came pushing over to England with the Conqueror. I imagine Anne married Tormarrie, her first husband, Tormarrie, led her a dog's life, and after his death she married Claude Brennan—son of a junior branch of the Brennans. Now she is a widow for the second time."

"And are there any children?"

"Two sons. The elder is the son of the first marriage and is the owner of Staple, of course. The younger is the child of the second marriage. I believe that since Brennan's death they all three live very comfortably together at Staple—at least they did ten years ago when I last heard from Anne. That was not long after Brennan died."

Jean wrinkled her brows.

"Rather a confusing household to

Glyn's decision to stop at Montevideo, she was scrupulously careful not to let him guess her recognition. She took her cue from his own demure, which was outwardly that of a man merely travelling for pleasure, and she listened with a grim sense of amusement when poor Monsieur Vauriel, the Maître d'Hôtel, recognizing Peterson as a former client, sympathetically recalled the sad circumstances of his previous visit and was roundly abused for his pains.

To Jean the loss of her mother had meant far less than it would have done to a girl in more commonplace circumstances. It was true that Jacqueline had shown herself all at once as kindhearted and generous in her genuine wish to compass the girl's happiness, and that Jean had been frankly fond of her and attracted to her, but in no sense of the words had there been any interpretation of a maternal or filial relationship. Of course I know I'm a quite superficial creature, but the same, you too really do make the most perfect host and hostess, and you truly hardly need to let me feel de trop."

But, despite the fact that Jacqueline had represented little more to her daughter than a brilliant and delightful personality with whom circumstances happened to have brought her into contact, she was conscious of a sudden thrill of pain as her glance travelled across the wide stretches of snow and came at last to rest on the shoulder of a man who was moved by an immense consciousness of loss—not just the mere sense of bereavement which the circumstances would naturally have engendered, but something more absolute—a sense of all the exquisite material elements which she had made to the woman who was dead.

And then came recognition of the uselessness of such regret. Nothing could have made Jacqueline other than she was—one of the world's great lovers. Mated to the man she loved, she had herself anything more to give. And the same reasoning, though perhaps in a less degree, could be applied to Peterson's own attitude of detachment towards his daughter; although Jean was intuitively aware that she had come to mean much more to him since her mother's death, even though it might be, perhaps, only because she represented a tangible link with his past happiness.

Thrusting aside the oppression of thought conjured up by her glimpse of that golden-haired, red-haired, and among the hills, she turned abruptly from the window and made her way down to the main entrance.

Here she discovered that Peterson had been claimed by some acquaintance. The encounter was obviously not of his own choosing, for he had experienced eye, his face bore the slightly restless expression common to him when circumstances had momentarily got the better of him.

His companions were a somewhat elaborate little Frenchman of fifty or thereabouts, with an unmistakable air of breeding, about him, and a stately-looking woman some fifteen years younger, whose warm brunette colouring and swift, mobile features proclaimed her of Latin blood. All three were conversing in French.

"Ah! La volé qui vient!" Peterson turned as Jean approached his companion with exclamation tinged with relief. Still in French, which both he and Jean spoke as fluently and with as little accent as English, he continued rapidly: "Jean, let me present you to Madame la Comtesse de Varigny."

The girl found herself looking straight into a pair of eyes of that peculiarly opaque, dense brown common to Southern races. They were heavily fringed with long black lashes, giving them a fictitiously soft and disarming expression, yet Jean was precision held something secret and implacable, almost repellent, an impression strengthened by the virile, strongly-marked black brows that lay so close above them.

For the rest, Madame de Varigny was undeniably a beautiful woman, her blue-black, rather coarse hair just a drop or two of Putnam's on any sore corn and out comes all the little corns which come up and drop off. No scar, no pain, no pinching from tight shoes. The only Putnam's Core Extractor. Satisfaction guaranteed by druggists everywhere.

framing an oval face, extraordinarily attractive in contour, with somewhat high cheek bones and a clever, flexible mouth.

Jean's first instinctive feeling was one of distaste. In spite of her knowledge that Varigny was one of the old-fashioned names in France, the Countess struck her as partaking a little of the adventures—of the type of woman of no particular birth who has climbed by her wit—and she wondered what position she had occupied prior to her marriage.

She was sharply recalled from her thoughts to find that Madame de Varigny was introducing the little middle-aged Frenchman to her as her husband, and immediately she spoke Jean felt her suspicious melting away beneath the warm, caressing cadences of an unusually beautiful voice. Such a voice was a straight passport to the heart. It seemed to clothe even the prosaic little Count in an almost romantic atmosphere of tender charm, an effect which he speedily dispelled by giving a Jean a full, true, and particularly in the case of the Countess, monetary symptoms which annually induced him to seek the high dry air of Montevideo.

(To Be Continued.)

Plenty of Money

Savings Bank Deposits Continue To Mount In Face Of Depression
The total of Canadian savings bank deposits in July, 1931, was \$40,000,000 higher than in July, 1930. The total in savings deposits in July of this year was nearing a billion and a half, or approximately \$1,400,000,000.

This is a large amount of money and it is rather a conflicting situation that it should be growing at a time when the country is obviously "hard up."

Several things may account for the increase. In the first place a great many persons with a little money to spare are now putting it into the banks instead of into the stock market. They are not so keen on the stock market as they were two years ago—probably the result of experience.

Hard times also encourage saving on the part of those who have jobs. Instead of spending as in normal times they are attempting to get something ahead because they feel that their jobs are not secure.

Furthermore, the opportunities for investing money in smaller developments are difficult to find at this time. Trade is in such a condition that the chances of any new enterprise succeeding is rather remote.

There is some evidence available that the industry of fear has something to do with the falling off in buying at this time. If workers felt sure of keeping their jobs they would be more ready in their buying—Leader-Post, Regina.

THE RHYMING OPTIMIST

By Aline Michaels

THE NAME OF LOVE

Men have taken the name of love in vain.

As a moon-like glow that came and waned;

They have lost the knowledge that love must be

Unchanged, through time and eternity. Though life is meretricious, kind and pure, As quick in movement as strong to endure.

They have bargained for terms and striven to prove

The right to reason and baffle in love. But love through the ages is still the same.

Not the flower of a day or a shining name, For when love the door of a life walks through

That life in an instant is shaped anew; The things that were sordid and mean depart

And a glamour grows in the happy heart; Ah, love means pity and power and pain,

And it enters into no life in vain!

Flashes Carry Heavy Loads
The whirr of big airplanes carrying three ton loads will be heard across the prairies in the future, according to a bulletin issued by the Canadian Pacific Railway. The new Junkers planes will travel at 160 miles per hour. T. Siera, superintendent of maintenance for the Canadian Airways, western division, is in Germany taking delivery of the ships. They are known as JU-52 type designed for fast freight service.

Light enough to supply the entire United States continuously for 170 years could be produced from the coal burned in the country in a year.

EPOOS FRUIT SALT

Mothers! Don't Risk Their Health With Violent Purgatives

Constipation is one of childhood's greatest enemies. Unless the intestinal system is kept clear and clean little health is almost sure to follow.

But severe acting laxatives are dangerous. The bodily system of child or adult is not meant to withstand the unnatural, forcing action caused by ordinary, cheap cathartics.

EPOOS Fruit Salt is a glass of water, every morning is the safest, surest and most pleasant way to insure cleanliness and perfect health.

Bright Future For Air Service

Canada Will Be Important Link In Air Route To Europe

Canada, as the all-important link between Europe on the east and the Orient on the west, was assured of a bright future in the air if the Department of Transport, and the various Provincial Governments, as well as the citizens helped to develop aviation. Major-General J. MacBrien, commissioner of the Royal Canadian Mounted Police and head of the Aviation League of Canada, told members of the Canadian Club at Toronto.

Recent figures by the Lindbergh and German aviators who had blazed new trails between the United States and Asia and Europe respectively, had shown the importance of having routes through the Dominion, he said. He said that a two-day air service between Winnipeg and England was feasible, and traced other routes of particular value to the commercial world.

Deaths From Tuberculosis

High Mortality Among Industrial Employees In Quebec, Nova Scotia and New Brunswick

Canada's tuberculosis death rate is much higher than that for the United States, and this discrepancy is due almost entirely to the high mortality among industrial employees. In the cities of Quebec, Nova Scotia and New Brunswick, according to a detailed study of the situation made public by Louis J. Dublin, Ph.D., at the sessions of the American Public Health Association held in Montreal, Dr. Dublin is the statistician of the Metropolitan Life Insurance Company, New York.

The rates quoted by him show that in 1929 tuberculosis took 50 lives among every 100,000 whites living in the United States. In Canada the death rate was 97.5 per 100,000.

Little Helps For This Week

"The Lord is my shepherd; therefore I can lack nothing."—Psalm 23. So whether on the hillsides high and fair, or in the sunless valleys where the shadows lie, what matter? He is there. And more than this: where'er the pathway lead, He gives to me no helpless, broken reed. Bp. H. W. Hand, sufficient for my need.

So where He leads me I can safely follow. And in the hereafter I shall know. Why in His wisdom He hath led me so.

—Henry H. Barry.

He is a strict but tender Master; and on the way which He leads us are not only rewards and thorns, but light, and love, and sympathy, and peace, and at the end—Heaven.—M. K. Vincent.

Idle Money Of No Benefit

If Put Into Circulation Would Help End Depression

A lot of twaddle has been expressed by the so-called economic experts who have talked of everything under high heaven as the cause of depression. The fact of the matter is, the average newspaper is telling the people more directly what is wrong than any other agency, as for example in the Ottawa Journal: "An unemployed dollar is only worth the paper it is printed on. It is as useless and as unproductive as an unemployed man. And only when all of our people get a firm understanding of this, only when those who have a little money, or a lot of it, stop putting it into circulation, will property start coming back as long as money lies idle in the banks."

The old country for Christmas

YOU can go home for Christmas NOW, even if the money you have left is less than you thought necessary. Fares on the luxurious Canadian Pacific Steamships are specially reduced, yet the comfort, service and cuisine is the same as before. Living costs are lower than they have been for years. You can go now for much less money.

Blue sail regularly and frequently each week. Last-minute special sailings to get you home for Christmas. For full particulars apply to the nearest agent.

Canadian Pacific Steamships

Nearly Nervous Prostration

Do you know her... this poor woman who wakes up her head aching, her nerves ragged? How many young women are suffering from this kind of nervous weakness? It is the result of a bad habit of overwork, of a life of worry, of a life of strain.

If they would just try Lydia E. Pinkham's Vegetable Compound, they would find it brings soothing, comforting relief. Get a bottle of the liquid from your druggist today. Or try it in the new convenient tablet form.

Thursday, Oct. 15th, 1931

John Sandercock was home
for Thanksgiving.

Chautauque commences on
Friday evening.

School Inspector Carr, was a
visitor in town for a few days
last week.

Mrs. G. Durk and Mrs. S. G.
Clarkson are visiting at Kin-
dersley.

Miss Morrison, superintend-
ent for Chautauque, arrived in
town on Monday night.

Geo. Bruce, of Calgary, ar-
rived in town on Friday night,
and has taken over manage-
ment of the beer parlor.

There will be a Halloween
Dance at Mayfield Hall on Fri-
day, Oct. 23. Everybody wel-
come. Admission, 50c.

A meeting of the Ladies of
the W. A. of the Anglican church
will be held at the home of
Mrs. W. Bicknell, on Tuesday,
October 20th, at 3 p.m.

There will be a dance in the
Empress Theatre on Friday,
October 30. Remember the
date.

Mr. and Mrs. Emerson Mc-
Cune and family, were visitors
of relatives here over Sunday
and Monday.

Miss Betty Duff and Miss
Hazel Northcott, accompanied
by a friend, Miss M. Wiggs,
were home for Thanksgiving.

Weather during the first of
this week has been sunny and
warm with frost at night,
very enjoyable and spring-like.

There has been great enthus-
iasm among hunters over goose
shooting and some have almost
incorporated the goose-step into
their daily walking.

Don't forget St. Mary's W.A.
annual Bazaar and Sale of
Home Cooking to be held on
Saturday, October 31st, in the
Municipal Hall.

Lorne Ginter and Sid. Ham-
ilton, left on Friday on a trip
to Pincher Creek, Alta. and oth-
er points, returning on Monday
night.

Messrs. Bicknell, J. Rowles
and J. Randall attended the
Anglican convention of the
Kootenai Diocese held at
Albion on Tuesday of last week.

Regret has been expressed by
many at the death of Jimmy
Forsyth, of Calgary, ferry
inspector, whose death resulted
from a paralytic stroke on Fri-
day. He was a visitor in town
over Wednesday night and ap-
parently seemed to be in very
fair health.

Grant Television and
Radiovision Permits

Montreal, Oct. 11.—The Dom-
inion government has granted
television and radiovision per-
mits to the newspaper La Pa-
resse, of Montreal. The paper
owns two stations which will be
used simultaneously, covering great-
er Montreal with television.
Engineers are now rushing in-
stallation of the first station of its
kind in Canada, the paper
announces.

Prairie Wheat Reaches
Overseas via Hudson Bay

With due pomp and circum-
stance, the steamer Farintosh
sailed into her berth in London
harbor, October 6th, laden with
the first cargo of Canadian
grain to be carried from the
new port of Churchill. The
trip occupied sixteen days, and
results in the cutting of nearly
a thousand miles off the rail-
way journey from the prairie
wheat fields to the Old Country
markets. The Hudson Bay
route is no longer a theory; it is
an accomplished fact.

Railway Companies To
Move Relief Foodstuffs Free

Both railway presidents an-
nounced on Sunday night to
the premiers of Alberta and
Saskatchewan that they are
prepared to transport food-
stuffs to relief organizations in
the two provinces.

In British Columbia in some
parts food crops are being left
to rot in the fields because it is
not profitable to ship them. It
is for the purpose of bridging
the gap between food abund-
ance and food shortage that the
proposed step is being taken by
the railway companies.

Cream Market Report

For the week ending Sep-
tember 26th, 1931, the following
prices were paid by creameries
per pound of butterfat, and at
the several grades of cream, and at
the points shown:

Edmonton, Special, 18c; No.
1, 16c; No. 2, 13c.
Calgary Creameries, special
grade, 17c; No. 1, 15c; No. 2,
12c.

Minimum Special grade, 16c;
No. 1, 14c; No. 2, 11c; off grade,
6c.

GRANT FLEMING, M.D., ASSOCIATE SECRETARY

Safety Through Prompt Action

In Canada, approximately
100,000 deaths occur each year.
Out of the total number, just
over 8,000 are the direct result
of tuberculosis. In our cam-
paign against this disease, we
are encouraged to know that
despite the heavy toll of human
lives which tuberculosis con-
tinues to take, the disease has
nevertheless been greatly re-
duced. Year by year, the ravages
of tuberculosis are being
lessened.

But what of those individuals
who make up the present num-
ber of victims? Can nothing
more be done for them than is
being done? We have no spe-
cial means of prevention against
tuberculosis, nor has there been
discovered, as yet, any specific
remedy to cure the disease.
Tuberculosis is fought, and
fought successfully, through
leading a hygienic life.

The person who has develop-
ed tuberculosis and goes to a
sanatorium for treatment, is
not given drugs or other reme-
dies. The treatment consists
of rest, fresh air and proper
food. He lives a hygienic life
and takes an additional amount
of rest. Rest is necessary in
order to allow the part to heal.

The power of nature to over-
come tuberculosis and bring
about a cure is great. The dis-
ease is generally a long drawn
out conflict between the germ
of the disease and the body.
The body stands an excellent
chance of winning, provided
that, at an early stage of the
disease, it is given a fair chance
to do so through a rest and fresh
air and proper food.

The cases which occur are
due first of all, to exposure to
the germs of tuberculosis which
come from someone who has
the disease, to which is added
the failure to live a healthy life,

giving the germs their chance
to multiply and cause trouble.

Most of the deaths which now
occur are due to the failure of
the individual attacked to so-
cure treatment early. Safety
demands prompt action; danger
follows delay.

In order that cases may be
treated early, it is necessary
that they be recognized early.
This means that the case must
go early to his doctor and be
examined. The person who
goes to his doctor once a year
for a health examination gives
the physician the opportunity
to discover such diseases as tu-
berculosis in their early stages,

and so secures early treatment.
The person who has a per-
sistent cough, or who has lost
weight, or who finds that his
ordinary work tires him when
it did not do so formerly, should
realize that such conditions are
suggestive of tuberculosis. They
may not be, but if they are, the
sooner it is known the better,
for then treatment can be
started.

If tuberculosis does occur,
safety lies in prompt treatment
and in nothing else.

Then there was the scotch-
man who was so close he got
slipped.

The Nights are Getting Long-
er. Why not have the best in Light.
